Hi Mark,

Hope you're having a productive week.

I've been going over our 'Cognitive Neuroscience: A Novel Approach' paper from the International Symposium on Fundamental Forces again, and I've identified a few critical revisions and additions I think we absolutely need to incorporate. Specifically, I've refined some of the discussion points based on the latest neurodegeneration findings that align perfectly with your recent grant work, and I've also re-evaluated a couple of figures for clarity.

I've compiled all my proposed changes and expanded notes into the attached document, "manuscript_updates.docx". It's quite comprehensive, and I really believe these updates will significantly strengthen the paper, especially with your upcoming presentation at the Journal of Distributed Systems in mind.

Could you please review this as a matter of urgency? I'd like to discuss them and finalize everything this week if possible, to ensure it's fully polished.

Thanks,

Mark Costa
