Hi Yara,

Hope you're doing well.

I've just received a rather urgent request from the Astrophysical Journal for our 'Brain-Computer Interfaces: A Novel Approach' paper. It seems they're pushing for an accelerated review process for our section, and they've requested a final round of critical edits and clarifications on the discussion around the implications for broader applications. They specifically asked for input on how our findings might align with ongoing research initiatives, which immediately made me think of the direction of your new Climate Research Fund grant.

I've taken a first pass at incorporating these points and made some significant (but hopefully final!) revisions to strengthen that section. I've compiled everything into the attached "manuscript_updates.docx".

Could you please review it as soon as you possibly can and let me know your thoughts? We need to send this back to them by tomorrow morning at the absolute latest to meet their expedited timeline. I wouldn't bother you if it wasn't critical.

Thanks so much for your quick turnaround on this!

Best,

Emily

Dr. Emily Carter
