Hi Fatima,

Hope you're having a productive week.

I know you're incredibly busy with the Brain Health Foundation grant work and preparing for your IEEE Transactions on Quantum Engineering presentation next month, but I just received some *critical* feedback on our 'Computational Analysis of Ancient Texts: A Novel Approach' paper from *Biomedical Engineering Insights*. It seems there are a few significant structural changes and data presentation tweaks they want before final acceptance, potentially tied to the next round of funding reviews we discussed.

I've made the necessary adjustments and incorporated them into the attached "manuscript_updates.docx". These are quite substantial and require your immediate review and approval, ideally within the next few hours if possible. We need to get this back to them ASAP to avoid any delays with the follow-up grant submission which is on a very tight deadline.

Please open the document and let me know your thoughts right away. My phone is on silent for a meeting, but I'll check email constantly.

Thanks so much for your quick turnaround on this.

Best,

Alex Wong
