Hi Omar,

Hope you're well and the work on the Space Exploration Grant is progressing smoothly at BioGenesis!

I've just received some critical feedback and last-minute additions for our 'Advanced Composites: A Novel Approach' manuscript, which we submitted to the Journal of Neuroscience Research. This is quite urgent as they've given us a very tight window for the next round of revisions.

Some of these points are particularly relevant to the new directions we're exploring with the \$2M Space Exploration Grant, and a few directly impact how we might present the work at the upcoming Journal of Marine Ecosystems conference next month.

I've compiled everything into the attached file, "manuscript_updates.docx". Could you please review it as soon as you can today? I'd really appreciate your immediate input on these changes, especially since they touch on the broader implications for our ongoing projects.

Let me know your thoughts after you've had a chance to look it over.

Best regards,

Isabella Kim
