Dear Kenji,

Hope you're having a productive week.

I'm writing regarding our 'Reinforcement Learning: A Novel Approach' paper that was recently published in the International Literature Festival Review. I've just received some incredibly time-sensitive feedback and critical revisions from a preliminary review we initiated, and they are quite significant.

Given the scope of these comments and their potential implications, especially with your new \$4M NSF grant focusing on reinforcement learning, I really need your immediate input. Some of these points could impact how we frame future work or even presentations.

I've compiled all the proposed changes and a detailed explanation of the feedback in the attached document, "**\*\*manuscript\_updates.docx\*\***". Please review it as a matter of **\*urgent\*** priority. I'm keen to get your thoughts before your World Water Congress Conference presentation next quarter, as some of the insights discussed might be relevant to your latest work you're preparing to present.

Let me know your availability for a quick call after you've had a chance to look it over.

Best regards,

Hiroshi Perez
